

# CLOUD COUNSELAGE

<https://cloudcounselage24.bitrix24.com/company/personal/user/1250/>

Name: REMSTON DSA

User-id: 1250

The screenshot displays the user profile for Remston Dsa in the Cloud Counselage system. The interface includes a left sidebar with navigation options like CRM, CRM Analytics, Sales Intelligence, Tasks, Webmail, Sales Center, Online Store, Contact Center, WAZZUP, Commission Calculator, Card to CRM Camcard, B242GA, ChatBot, Site templates, Bitrix24 Implementation, Time and project reports, API WhatsApp Integration, and Robotic Process Automation. The main content area shows the user's profile card with a photo, a 'MOBILE APPLICATION' status, and tabs for General, Tasks, Calendar, Drive, Activity Stream, Efficiency, and Worktime. The 'Contact information' section lists details such as First name (Remston), Last name (Dsa), Position (AI intern), Contact email (remstonsda7@gmail.com), Department (202003), Second name (field is empty), Date of birth (22 January 2000), Mobile phone (+919372132643), and Work phone (9372132643). There is also a 'Measure your stress level' widget and an 'Appreciations' section with various icons.

MOBILE APPLICATION last seen 31 seconds ago

Contact information edit

First name Remston

Last name Dsa

Position AI intern

Contact email remstonsda7@gmail.com

Department 202003

Second name field is empty

Date of birth 22 January 2000

Mobile phone +919372132643

Work phone 9372132643

Phone 9372132643

Measure your stress level

HOW TO MEASURE?

Appreciations

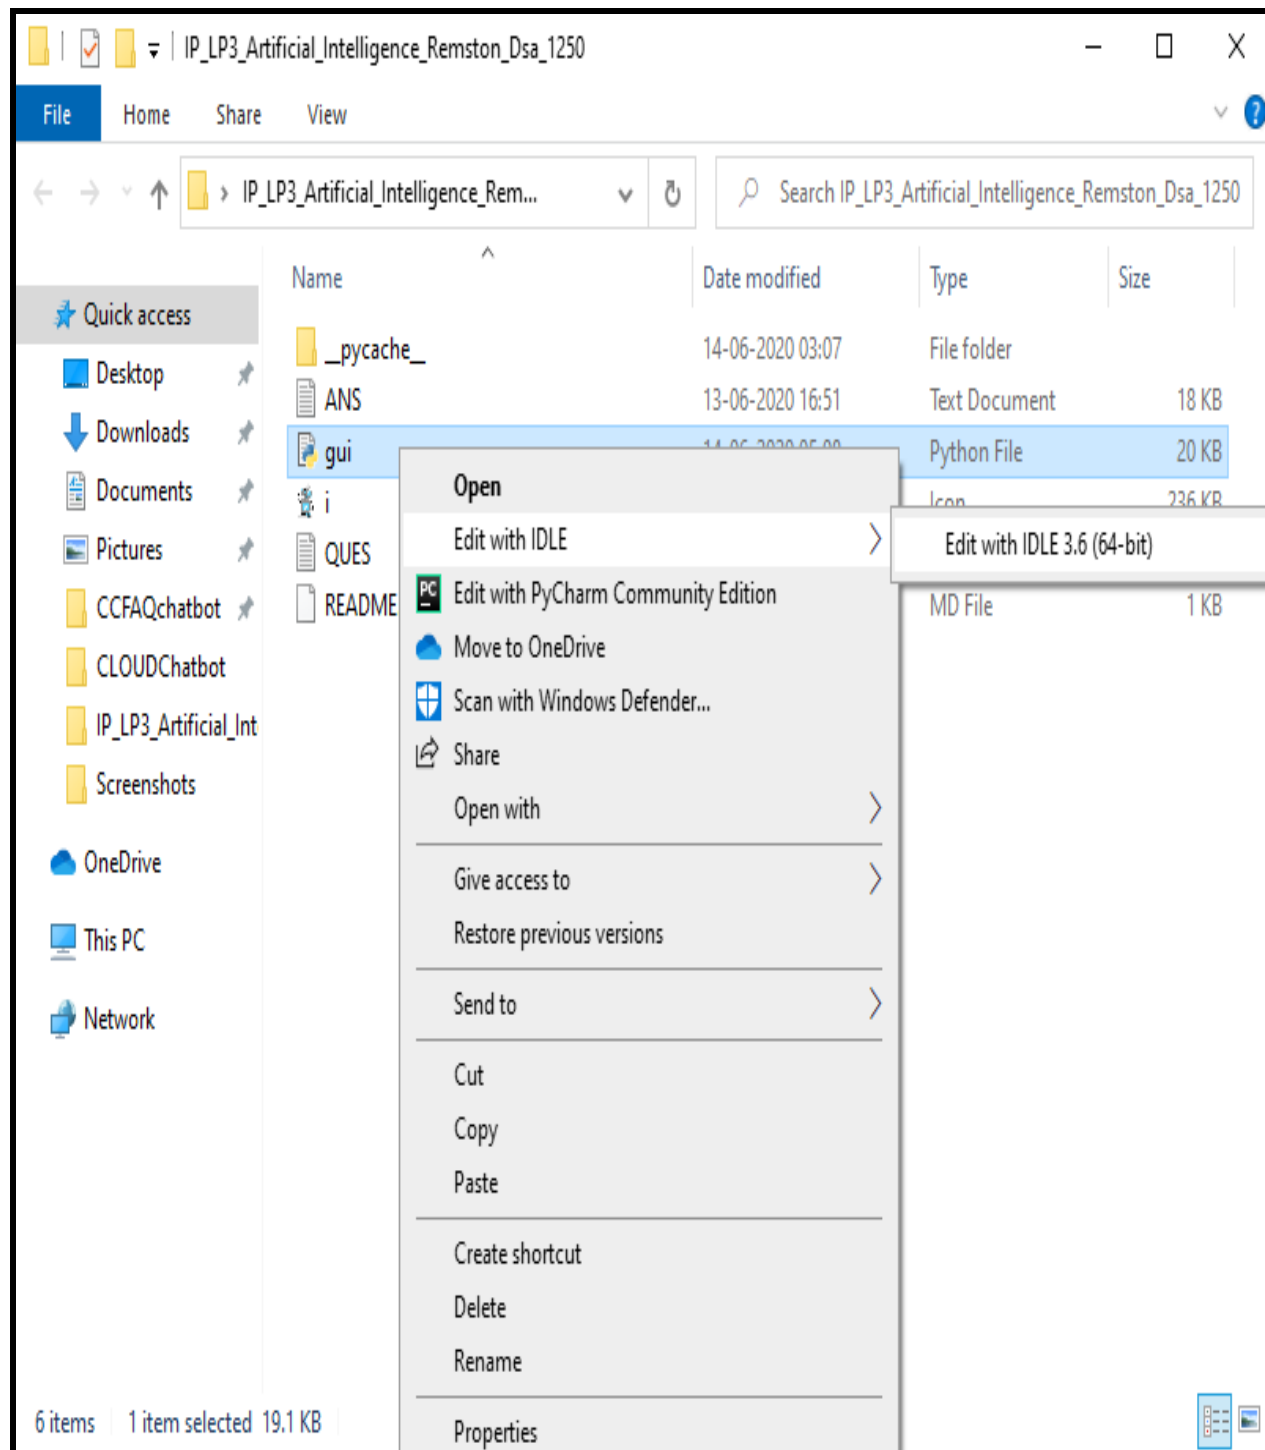

**Step1:**

**Open the folder IP\_LP3\_Artificial\_intelligence\_Remston\_Dsa\_1250**

## Step2:

Open the python file gui.py with any python IDLE

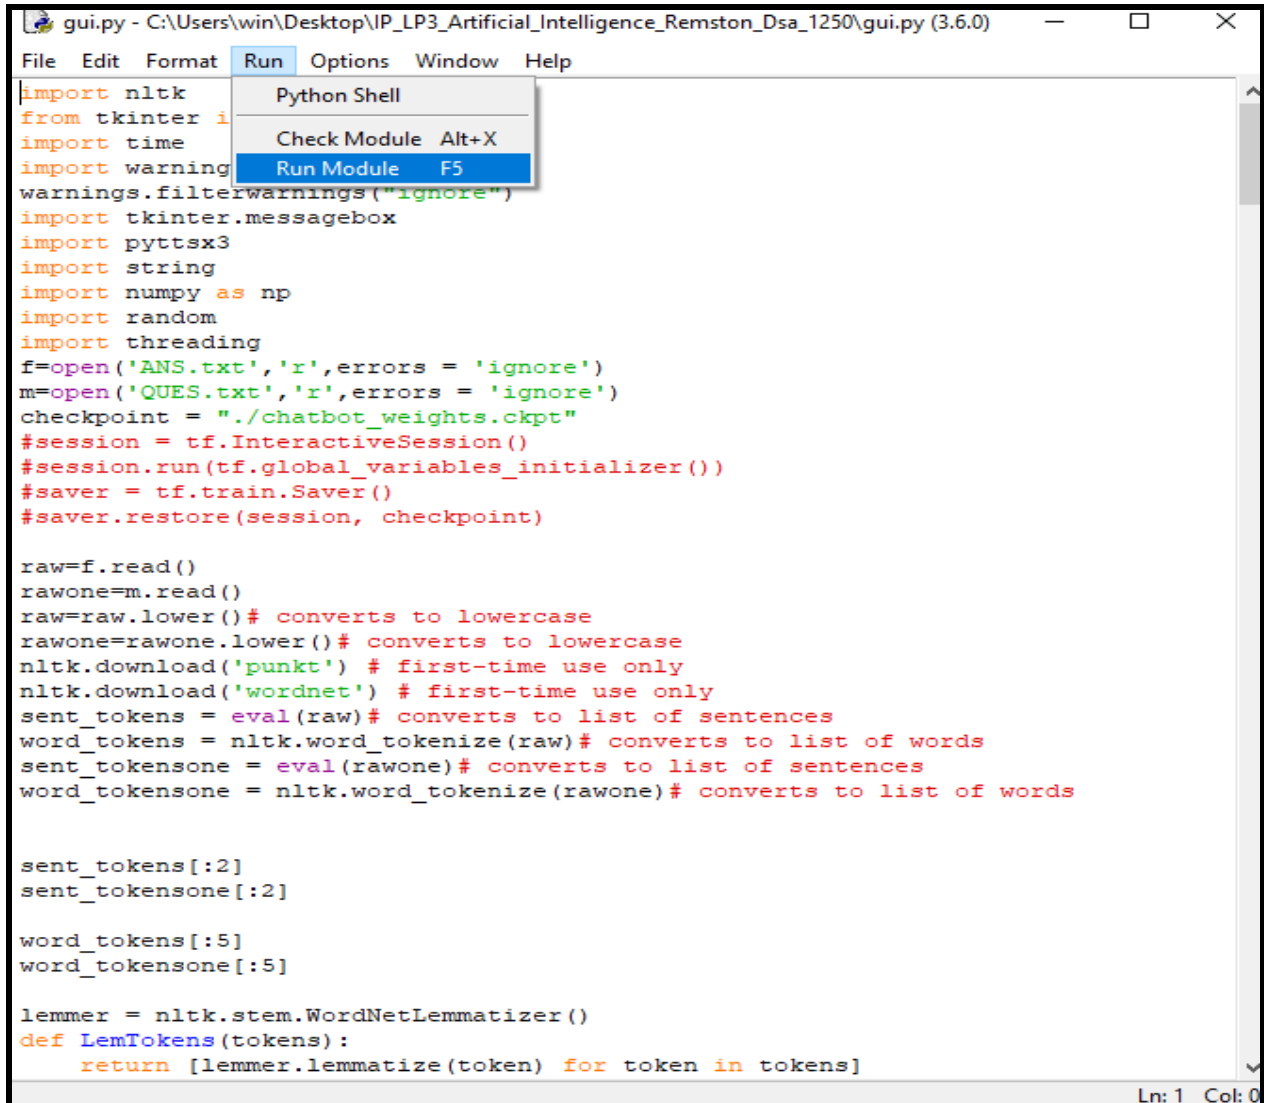

### Step3:

Run the **gui.py** python file

Prerequisites: *python python libraries*

1. nltk
2. tkinter
3. time
4. pyttsx3
5. string
6. numpy
7. random
8. threading

```
gui.py - C:\Users\win\Desktop\IP_LP3_Artificial_Intelligence_Remston_Dsa_1250\gui.py (3.6.0)
File Edit Format Run Options Window Help
Python Shell
Check Module Alt+X
Run Module F5
import nltk
from tkinter import *
import time
import warnings
warnings.filterwarnings("ignore")
import tkinter.messagebox
import pyttsx3
import string
import numpy as np
import random
import threading

f=open('ANS.txt','r',errors = 'ignore')
m=open('QUES.txt','r',errors = 'ignore')
checkpoint = "./chatbot_weights.ckpt"
#session = tf.InteractiveSession()
#session.run(tf.global_variables_initializer())
#saver = tf.train.Saver()
#saver.restore(session, checkpoint)

raw=f.read()
rawone=m.read()
raw=raw.lower()# converts to lowercase
rawone=rawone.lower()# converts to lowercase
nltk.download('punkt') # first-time use only
nltk.download('wordnet') # first-time use only
sent_tokens = eval(raw)# converts to list of sentences
word_tokens = nltk.word_tokenize(raw)# converts to list of words
sent_tokensone = eval(rawone)# converts to list of sentences
word_tokensone = nltk.word_tokenize(rawone)# converts to list of words

sent_tokens[:2]
sent_tokensone[:2]

word_tokens[:5]
word_tokensone[:5]

lemmer = nltk.stem.WordNetLemmatizer()
def LemTokens(tokens):
    return [lemmer.lemmatize(token) for token in tokens]
```

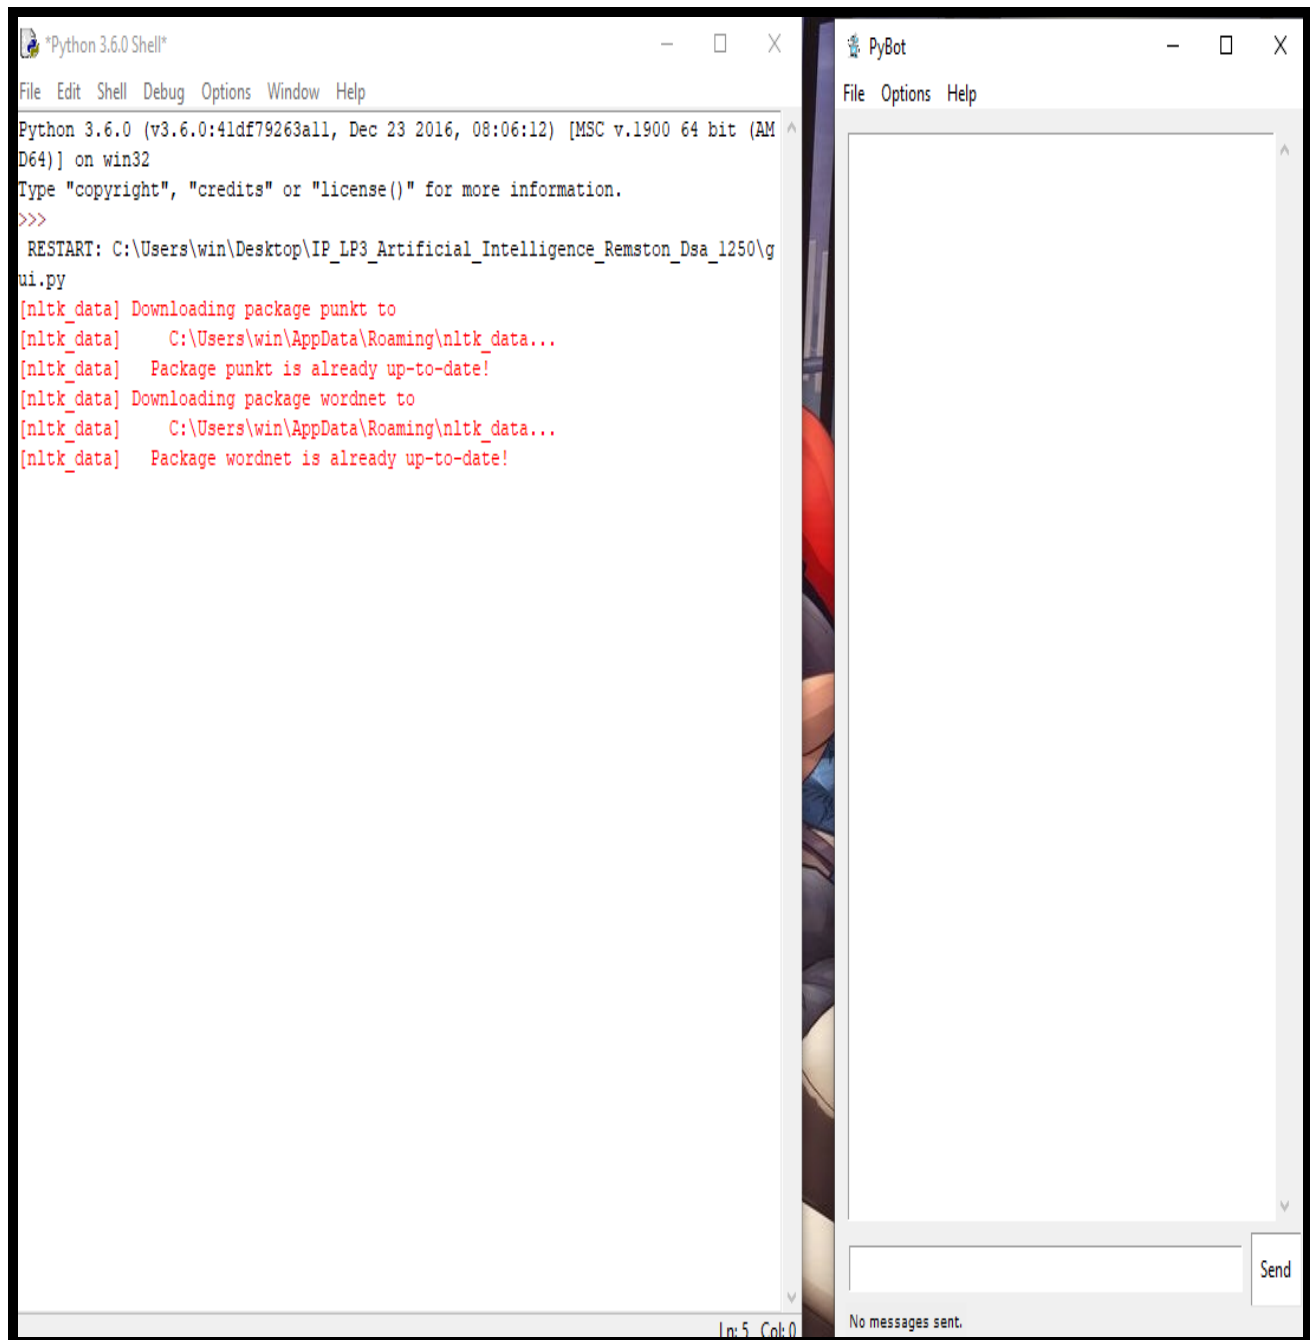

Ln: 1 Col: 0

#### **Step4:**

**Internet connection** is required for nltk

***nltk.download('punkt') # first-time use only***

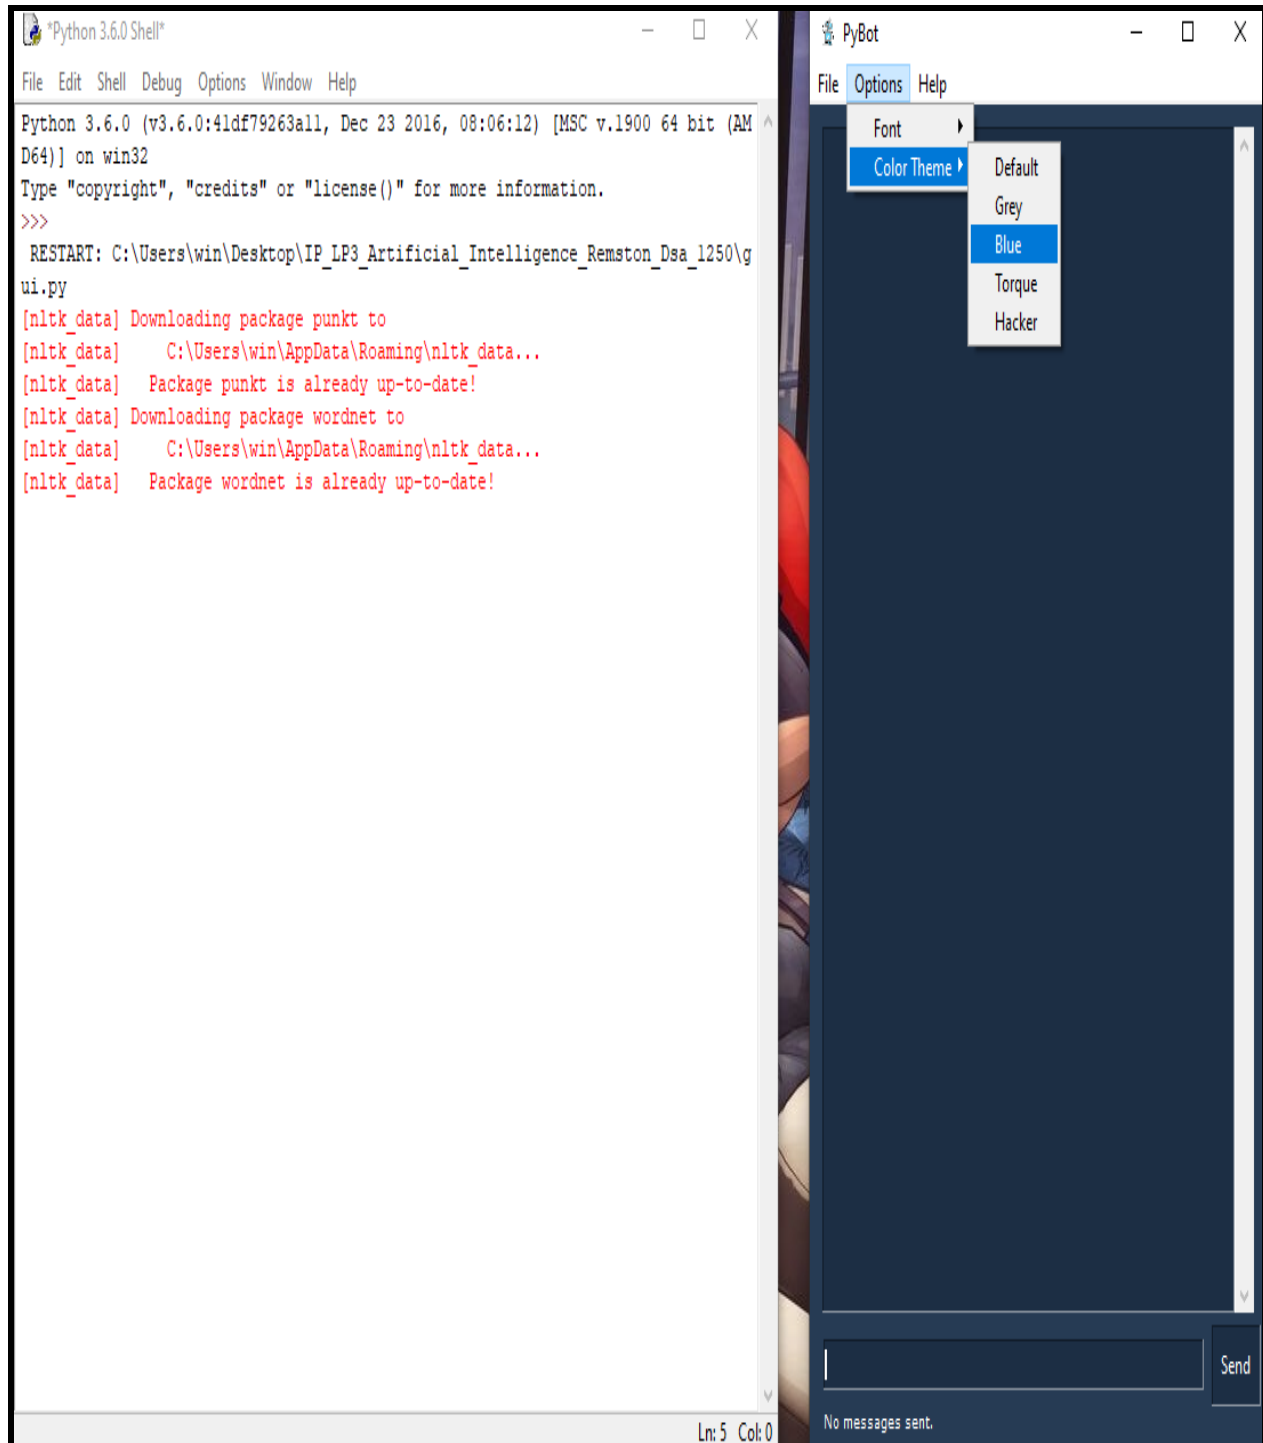

***nltk.download('wordnet') # first-time use only***

### Step5:

**Click on options ==>Select Color Theme==>Any color**

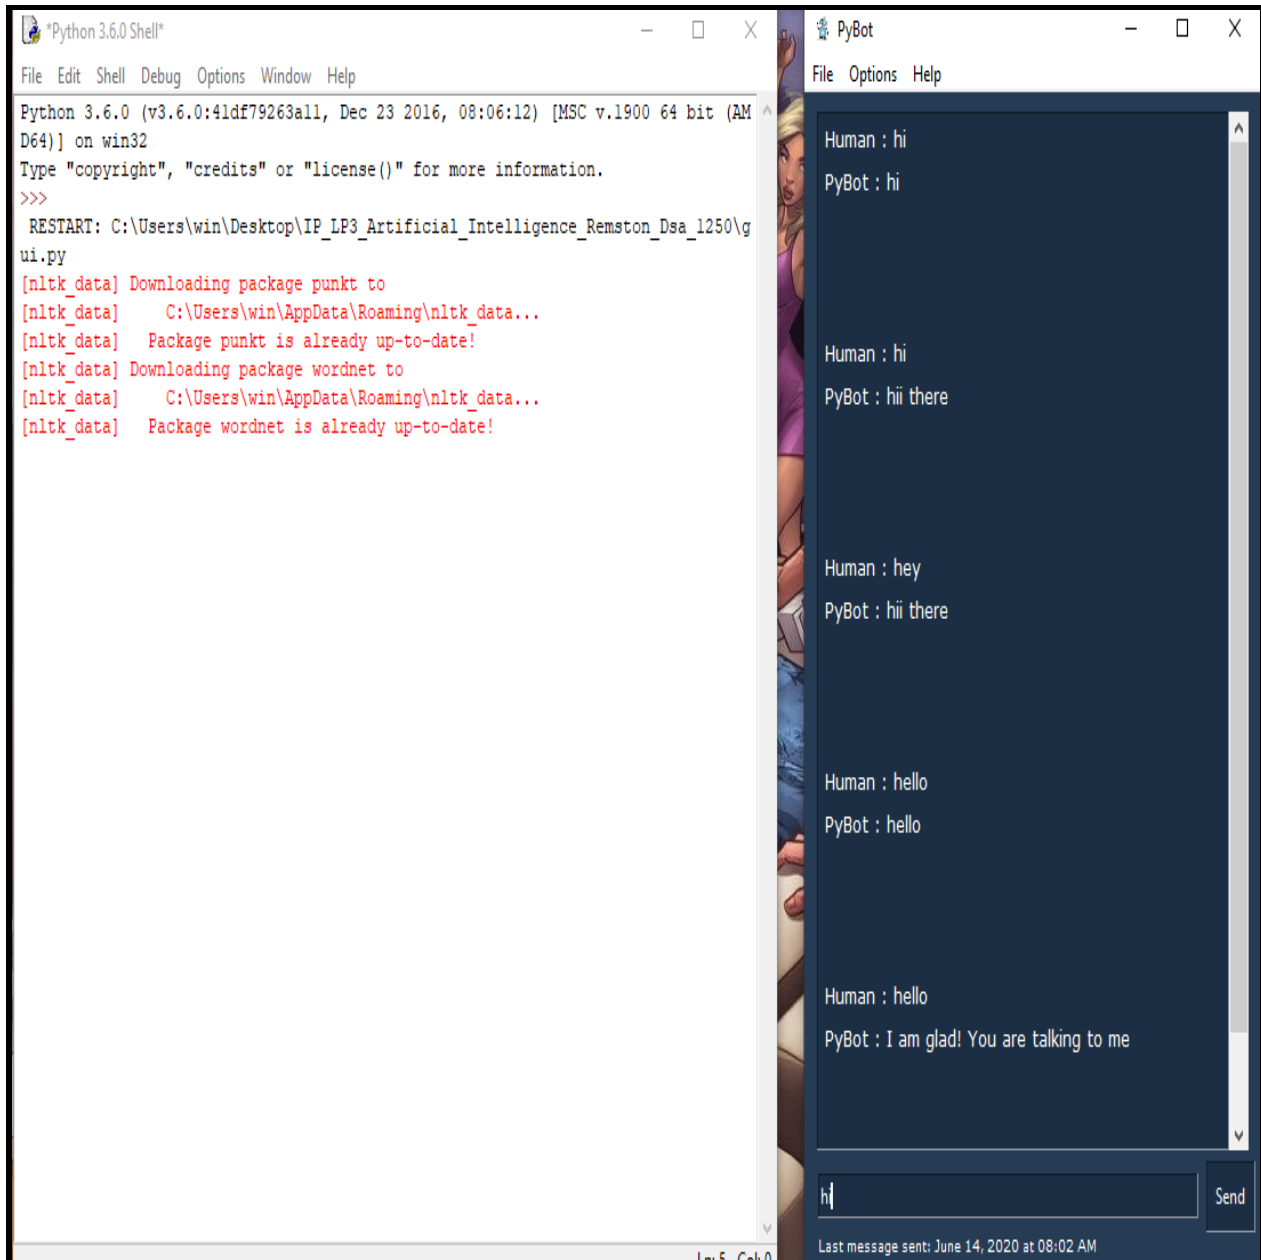

**Click on options ==>Select Font==>Any font type**

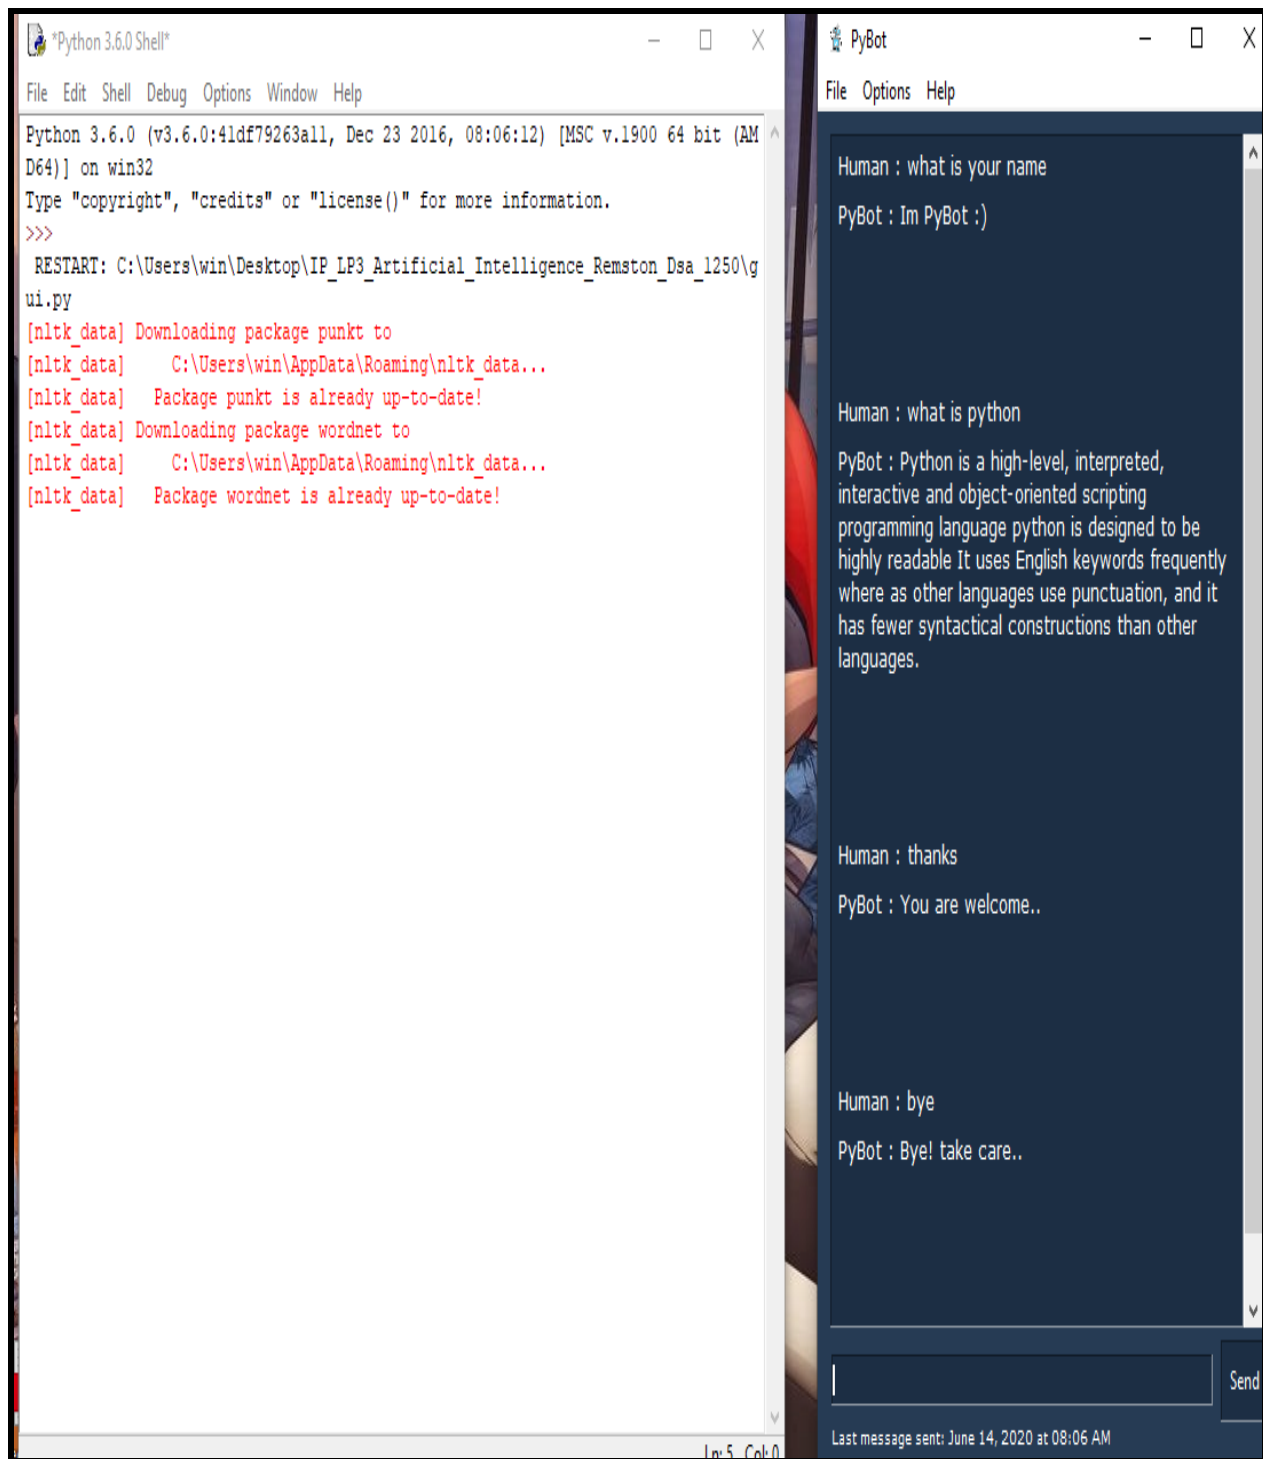

## Step6:

### Start with Greetings or Introduction like

*Hey, Hi,Hello,What is your name? ,What is python,thanks,bye,exit etc*

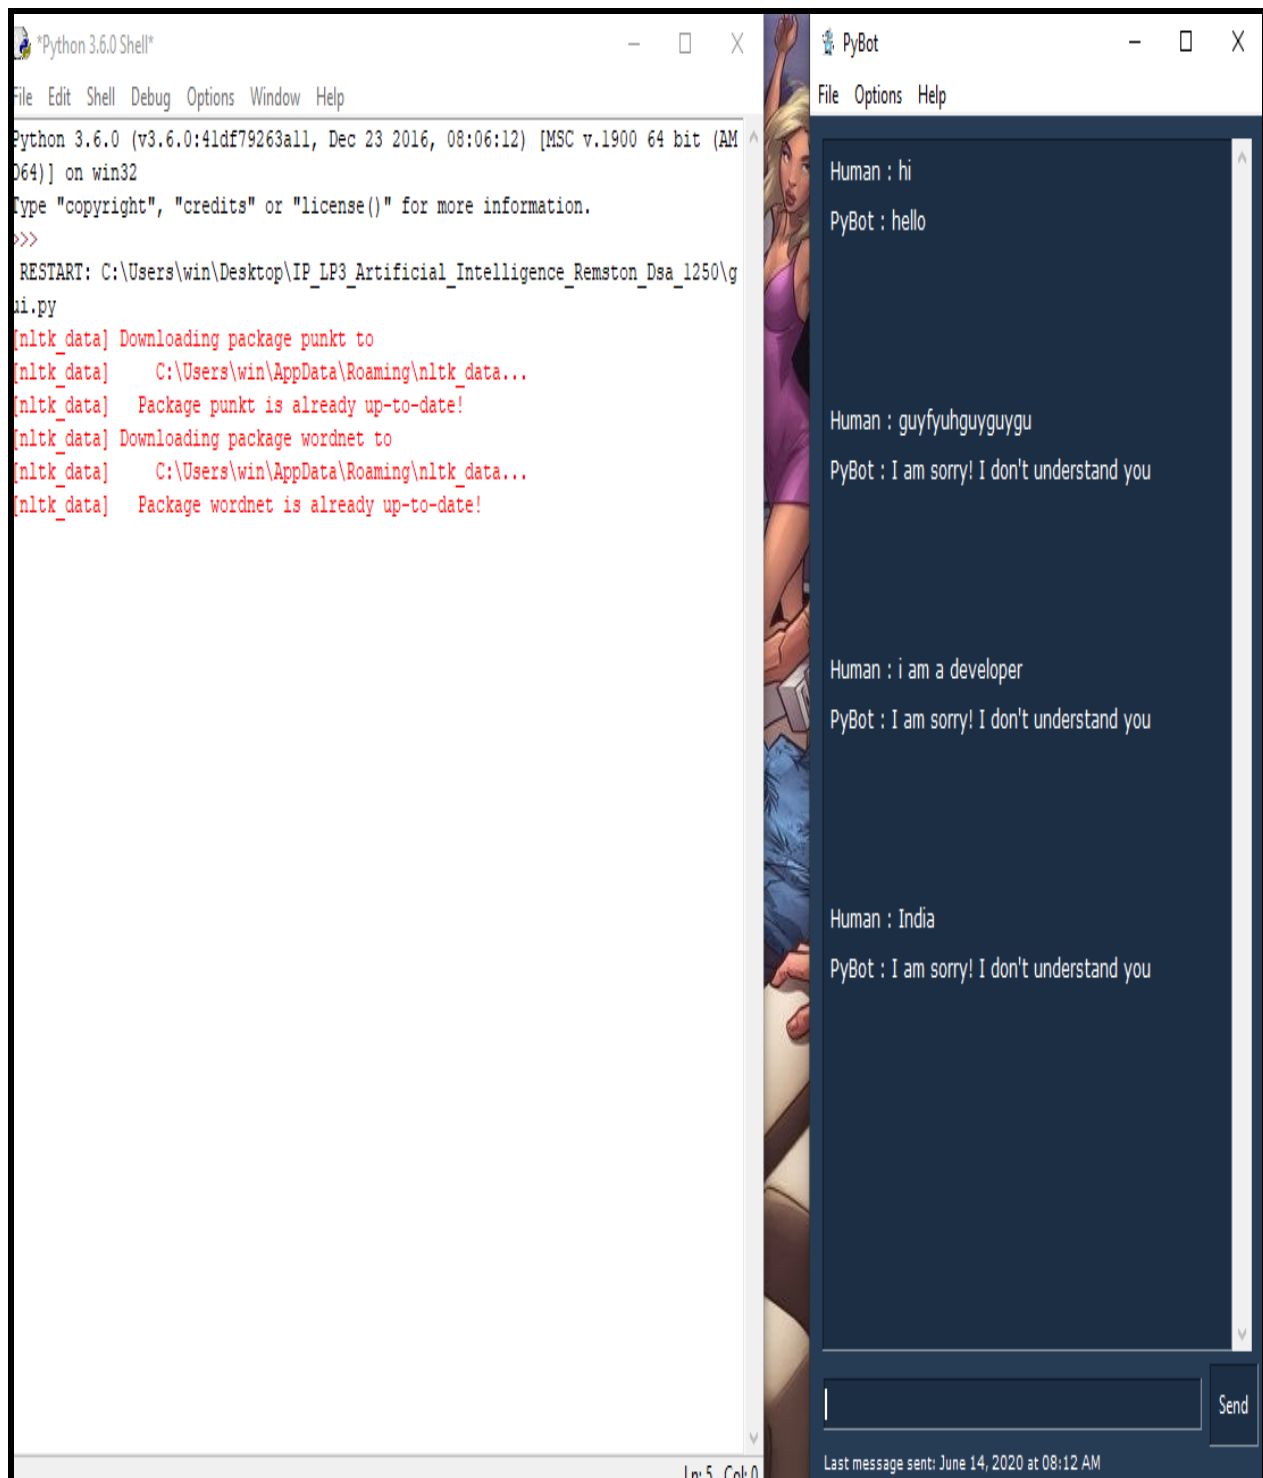

### Step7:

***PyBot CANNOT handle all type of queries as it has predefined Query dataset!***

## Step8:

Open **QUES.txt** and **ANS.txt** & Validate by asking same Query or keywords based on the Query!

The screenshot displays a chat window with three panes. The left pane shows a series of questions from a user. The middle pane shows the corresponding answers from a bot named 'PyBot'. The right pane shows the same questions and answers, but with the bot's responses expanded to show more detail.
